Company profile

TWINS RCI IS PROFESSIONAL CHEMICAL COMPANY IN WEST AFRICAN REGION

Specializing deal and Import kinds of quality CHEMICALS since 2014.

The products include industry chemical, water treatment and Minerals. Our Management team has over 10 years of combined expertise meeting the need of clients.

We are proud our Quality Chemicals and Service was approbated by the client through WEST AFRICA.

Besides the quality we think the competitive price of good is also important. Our comprehensive distribution network, buying power and efficient inventory management system allow us to offer our products at the best possible prices. Our principle is :

Quality Chemicals with Competitive PRICES **WE SUPPLY !**

We are a proud provider of metallurgical solutions, not merely a supplier of reagents. We look to work with customers in the application of our chemicals. This includes investing in product application equipment, and technology as a way we exhibit customer focus and supplier loyalty. Inherent in our supply philosophy is we pay close attention to the practical aspects of the extractive metallurgy of minerals, essentially, we focus on the application of all our reagents within the unique context of the client's ore. Our Chemical and Metallurgical experience in this practical aspect of performance metallurgy can often have a profound effect on total supply cost, a tangible benefit which not all other suppliers can match.

Company profile

From inception TWINS RCI business has been to provide chemical solutions to the West African (Mali Guinea Ivory Coast Senegal) Mining Industry, its activities have recently expanded to include water treatment and a broader activity in the industrial chemical market.

After more than a decade serving the Mining Industry in West Africa via its distribution networks, the European Spring of 2020 was the beginning of a global shipping crisis which has wreaked havoc in supply chains across the world. With this new reality Fulani reviewed its business strategy and has now entered into a partnership with many other logistics companies, which have significant experience in global procurement, bulk commodity shipping expertise, as well as its own local distribution network, which complemented those of TWINS RCI

We have knowledge and experience of importing into most African countries and have formed a close working relationship with clearing and transport companies in the countries where we operate.

We are able to offer a complete range of chemicals and have been awarded contracts by a number of mines to supply all their consumables during commissioning and the early stages of operation. This is because of our experience and track record in supply of mines in difficult to access areas of the African continent. Our commitment is demonstrated by the fact that we have invested in warehousing and other services in a number of African countries.

Company profile

In the West Africa, we supply our products to Cote D'Ivoire, Guinea, Mali, Senegal, We will be commissioning very soon a bonded warehousing complex near Bamako where we have the capability to deliver reagents to the West African region. At this warehouse we will install an incinerator that is approved by the Environmental Protection Agencies (EPA) for the destruction of sodium cyanide packaging and all safety requirements .

This enables us to offer a full supply chain solution, including customs clearing.

Your satisfaction is our most interested thing, Also your any suggestion will be highly welcome by us

Enjoy our good PARTNERSHIP and hope to hearing from you !

Product introduction

Flotation Collectors

(Collector NC228 Collector NC404 PAX - Potassium Amyl Xanthate SIBX - Sodium Isobutyl Xanthate SIPX - Sodium Isopropyl Xanthate SEX - Sodium Ethyl Xanthate)

Flotation Activators & Depressants

(Carboxymethylcellulose Guar Guar Derivatives Copper Sulphate Pentahydrate ,Lead Nitrate)

Flotation Frothers

(FROTHERS NF119 FROTHERS NF121 METHYL ISOBUTYL CARBINOL MIBC)

CYANIDE DETOXIFICATION

(Sodium Metabisulphite SMBS Copper Sulphate Pentahydrate Sulphuric Acid Hydrogen Peroxide Zinc Sulphate Monohydrate Ferrous Sulphate Ferric Chloride Anhydrous)

Product introduction

FLOCCULANTS AND COAGULANTS

(Cationic Flocculant Powder Cationic water soluble polymer for dewatering Non Ionic Flocculant Powder Non Anionic water soluble polymer for dewatering Anionic Flocculant Powder Anionic water soluble polymer for dewatering Polydadmacs Organic Coagulants Polyamines Organic Coagulants)

pH Adjustment & Control

(Hydrated Lime, Calcium Hydroxide, Quick Lime, Calcium Oxide Sodium Hydroxide (Caustic Soda Peals and Flakes) Hydrochloric Acid Sulphuric Acid)

Leaching & Absorption

(Sodium Cyanide armoisine Dye Synthetic red dye for the coloration of Sodium Cyanide Dosing Activated Carbon CTC 40-60. Granulated Coconut Shell)

Leach Accelerants & Oxidants

(Lead Nitrate Intensive cyanidation additives Technical grade catalyst's, formulated for intensive cyanidation of gold concentrates viscosity Modifiers Hydrogen Peroxide Hydrogen Peroxide Hydrogen Peroxide Copper Sulphate Pentahydrate)

Product introduction

Scale Inhibition, Descalants - Antiscalants – Biocides

(High Temperature Elution Antiscalant Process Water Antiscalant Process Water (Calcium Sulphate)
Scale Inhibitor Bromicide Tablets industrial process water Sulphamic Acid)

Gold ROOM Reagents

(Anhydrous Borax Silicon Dioxide Sodium Nitrate Potassium Nitrate Sodium Carbonate (Dense)
Calcium Fluoride Zinc Dust Nitric acid)

Speciality and Others

(Zinc Sulphate Heptahydrate Sodium Chloride Ethylenediaminetetraacetic acid Citric Acid
WaterGuard Nutrient Feed for Bio-Oxidation Circuits Nutrient Feed Biox Smelting Flux Sodium
Hydrosulfide Manganese Dioxide)

WATER TREATMENT
